

FOR IMMEDIATE RELEASE -

Northern911 Completes SOC 2 Type I Audit

- Rigorous audit validates Northern911 as a trusted secure emergency operating centre –

(March 1, 2021) – Northern911, an emergency response company offering emergency monitoring and transfer services, announced that it has successfully completed a Service Organization Control (SOC) 2 Type I audit. Based on the American Institute of CPAs (AICPA), and the Chartered Professional Accountant (CPA) Trust Services Principles, the stringent SOC 2 guidelines provide assurance on the suitability of the design and operating effectiveness of its internal controls.

As companies increasingly use outside vendors to perform activities that are core to their business operations and strategy, there is need for additional trust and transparency from their vendors. Northern911 retained an independent auditing firm, SAV Associates, for the SOC 2 Type I audit. This report affirms that Northern911’s information security practices, policies, procedures and operations meet the arduous SOC2 standards.

“Completion of the SOC 2 Type I audit reinforces Northern911’s ongoing commitment to security, availability, and confidentiality.” says Jim Whitehead, Chief Technology Officer at Northern911. “Our customers can feel confident the controls and safeguards we employ to protect and secure their data meet or exceed industry standards and best practices.”

In addition to SOC 2 compliance, Northern911 continues to refine and augment their security operations as Next Generation 9-1-1 is implemented across Canada and the United States.
